

CISO Assistant

One-Stop-Shop GRC platform

Company 🏢

- **intuitem**, French company 🇫🇷, established in 2018
- Founded by seasoned cybersecurity practitioners
- Expertise in Cloud, Data/AI, and Cybersecurity
- Provides consultancy services and products
- Multiple references worldwide across various industries

What is GRC

- **GRC**, stands for **G**overnance, **R**isk, and **C**ompliance
- It's **one way of structuring cyber security programs** around risk management and compliance processes with internal policies and regulatory requirements
- **Can be a powerful tool** to avoid re-inventing the wheel when shaping a cyber security posture, while being pragmatic and matching the industry and regulatory expectations

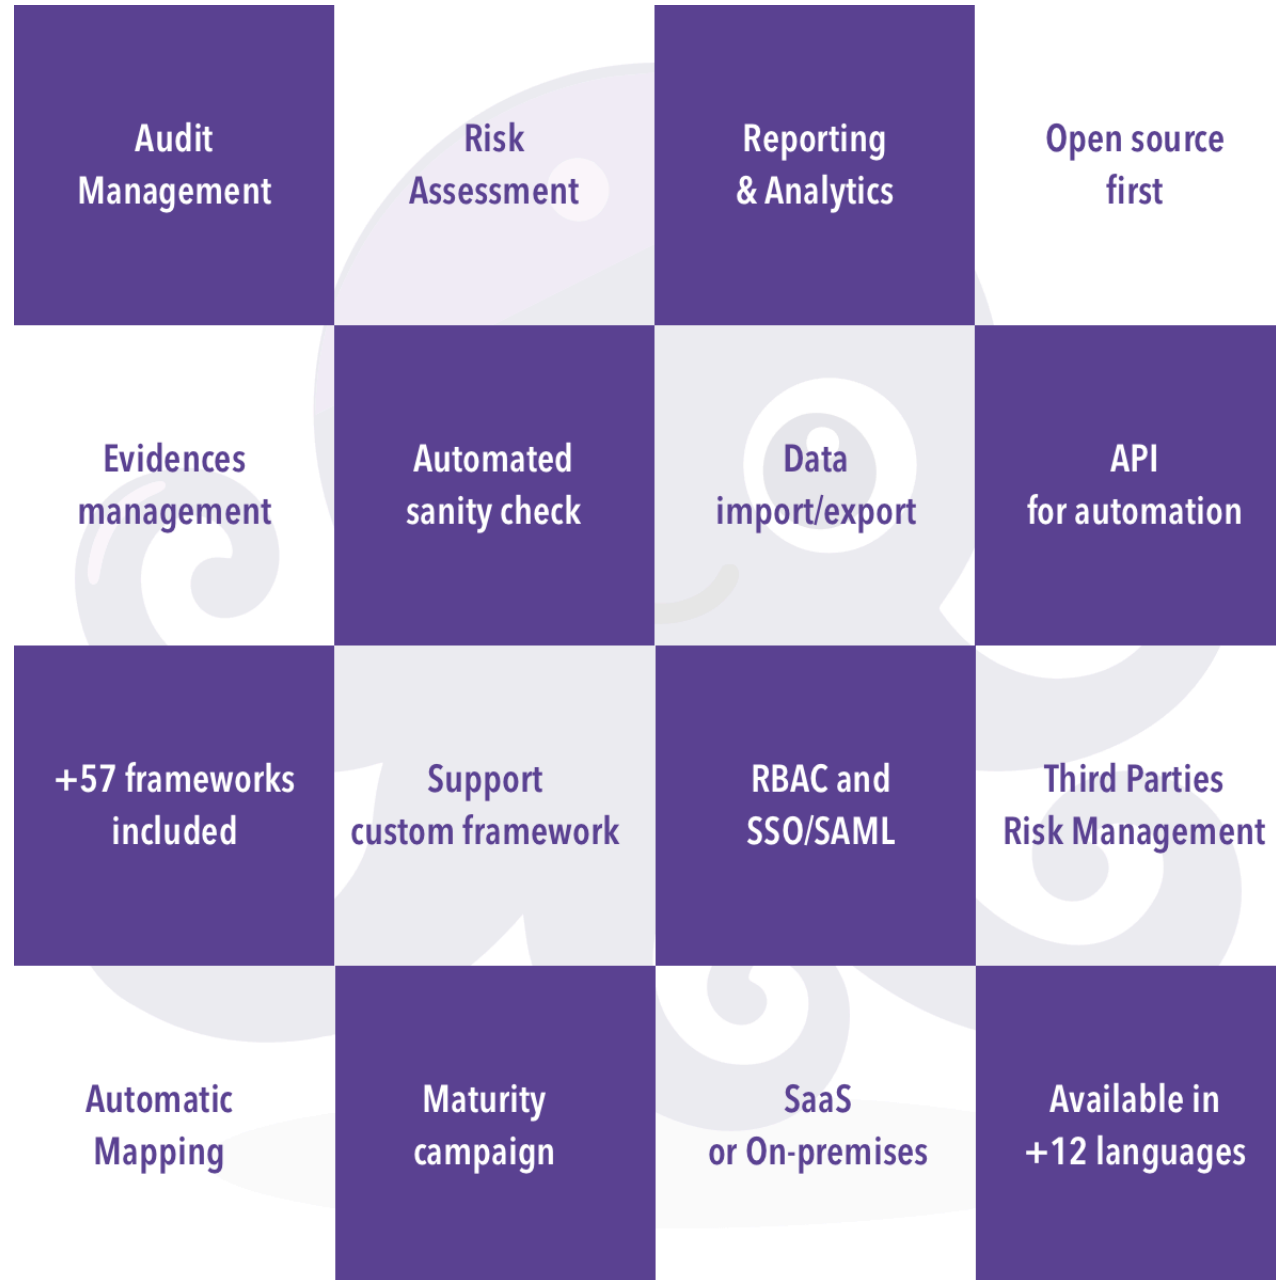

Problem framing

- Information is lost across multiple Excel sheets or tools
- Too much paperwork instead of focusing on remediation actions
- Can't use previous work efficiently
- Lack of flexibility in deployment options
- Existing tools are too specialized and have a steep learning curve
- Lack of customization capabilities
- Costly existing solutions

CISO Assistant

- One-Stop-Shop to manage cybersecurity programs
- Open Source and Open formats
- API-first, useful for automation
- Can be deployed On-premises, SaaS, or on workstation
- Collaborative and productivity-driven
- Built-in library of over 57 frameworks and standards
- Multiple customization options
- Free community edition
